Abstract (en)
[origin: ES2684128A1] Domestic appliance device and procedure for the manufacture of a household appliance device. The present invention relates to a domestic appliance device, in particular, to a cooking field device, with at least one shielding plate (20a-b) for electromagnetically shielding at least one electronics. In order to improve the efficiency, it is proposed that at least one section (22a-b) of the shield plate (20a-b) is provided to considerably attenuate at least the regular reflection of the light.
