Abstract (en)

[origin: ES2685026A1] Cooking system and procedure for the start-up of a cooking system. The invention relates to a cooking system (10) with at least one underlying unit (12), which is provided in at least one heating operation state to be arranged between a cooking-battery element (14) that has been of heating and a cover plate (16), and with an induction heating unit (18), which is provided for heating the cooking battery element (14). In order to provide a generic device with better identification-related properties, it is proposed that the cooking system (10) has at least one identification unit (20) which is provided to simultaneously identify the underlying unit (12) and the minus another object of identification (14, 24, 26).
