Abstract (en)

[origin: CA3004778A1] The invention relates to a semitransparent security element, which has different colours when viewed in incident light and in transmitted light, comprising either (a) a transparent carrier substrate with a front side and a rear side, wherein the front side has a metallic layer "V-a" that is coloured in a first colour and is obtainable in a printing process by means of coloured metal pigments and the rear side has in sequence a colour layer "R-a" appearing in a second colour and a metallic layer "R-b" that is coloured in a first colour and is obtainable in a printing process by means of coloured metal pigments; or (b) a transparent carrier substrate with a front side and a rear side, wherein the front side has in sequence a semitransparent metallic layer "V-A" and a colour layer "V-B" appearing in a first colour and the rear side has in sequence a colour layer "R-A" appearing in a second colour, a semitransparent metallic layer "R-B" and a colour layer "R-C" appearing in a first colour.
