Abstract (en)
[origin: WO2017144197A1] The invention relates to a vehicle, in particular a rail vehicle (1), comprising at least one bogie (10) which supports a car body (6) located above said bogie and has at least two track guide units, in particular at least two wheel sets. According to the invention, it is provided that a power converter (120) is indirectly or directly held by means of the car body floor (6a) of the car body (6) that is located thereabove and that at least one linkage (400) mechanically couples the bogie frame (11) to the power converter (120).
