Abstract (en)

[origin: WO2017093009A1] The invention relates to a system for feeding a stack of labels (12), said system comprising a guide (24; 50) and a carriage (26; 62) which is guided on the guide, has at least one urging element (18) for the stack of labels, is urged on the guide against the removal position (14) for the stack of labels, and can be moved along the guide by a driving mechanism (22; 42; 72) that is driven by a driving motor (20). According to the invention, the driving mechanism (22; 42; 72) receives the force for urging the carriage (26; 62) into the removal position from the torque of the driving motor (20).
