Abstract (en)

[origin: WO2017093064A1] The present invention concerns a labelling device (1) for bottles (2) comprising a strip (11) in the shape of a spiral characterised in that the strip is configured to have a geometry that can vary between two extreme positions: - a first position in the general shape of a disc, when the device is positioned on a flat surface, such as a table, - a second position in the general shape of a coil, when the device is fitted over the body of the bottle from the neck, the inner edge of the spiral then being in contact with the body of the bottle.
