Abstract (en)

[origin: WO2017091839A1] The invention relates to an installation socket (1) for at least one line connection (2, 3), in particular a water and/or electric line connection, for installing into walls, floors, ceilings, consoles, or boxes, comprising a socket body (4) which has securing means (5) for installations (6) paired with the socket body (4). The aim of the invention is to provide advantageous assembly conditions for installations. This is achieved in that the socket body (4) is equipped with first latching elements (7) on the peripheral casing interior or exterior, and an assembly sleeve (8) is inserted into the socket body (7) coaxially to the socket body at least substantially in the axial direction (9), said assembly sleeve having the securing means (5) and being equipped with second latching elements (10) which latch with the first latching elements (7) of the socket body (4).
