Abstract (en)
[origin: CA3004661A1] The invention relates to a recharging station (100) for an electric public transport vehicle, such as a bus or guided bus, comprising: at least one first electrical connector provided for electrically connecting said station (100) to said vehicle; at least one second electrical connector provided for electrically connecting said station (100) to an external electric power source; and a structure defining at least one area (102) for holding people; said station (100) being provided in the form of a rigid integral assembly which can be moved and installed on a required site as a single unit. The invention also relates to an electric public transport facility comprising such stations.
