Abstract (en)
[origin: CA3056480A1] The invention relates to a device for packaging pharmaceutical portions. In known devices, the packaging or blister-packing process of the pharmaceutical portions is prone to error. In order to solve this problem, the invention provides a device which has a plurality of storage and dispensing stations (10); at least one guide and collecting assembly; a packaging material supply (40); a packaging device (30) with a folding and guiding device (50), said folding and guiding device (50) having a packaging material receiving region (52) with a through-opening (51); a guide device (60) which is arranged above the folding and guiding device (50) and which comprises a receiving section (61) for pharmaceutical portions and a guide section (62) that extends in the direction of the through-opening (51) of the folding and guiding device (50); a first joining device (70) which is arranged downstream of the folding and guiding device (50); and a second joining device (90) which is arranged downstream of the first joining device (70).
