Abstract (en)

[origin: EP3385409A1] The present invention relates to an electrolytic sulphuric acid bath comprising a mixture of gelatine and a compound of general formula (I) as additives, to a method for electrorefining of tin comprising applying a current to the electrolytic sulphuric acid bath of the present invention, and to the synergistic use of gelatine and a compound of general formula (I) as additives in an electrolytic sulphuric acid bath for tin electrorefining.
