Abstract (en)
[origin: CN108691471A] The invention relates to a furniture fitting for carrying out a combined sliding and pivoting movement of a multi-part door (20), which has at least a first surface element (21) and a second surface element (22). The furniture fitting has a sliding guide (30) for the first surface element (21) and a pivoting guide (40) for the first and the second surface element (21, 22), the furniture fitting having a sliding guide (30) for the first surface element (21). and a pivoting guide (40) for the first and the second surface element (21, 22), and wherein - in a first movement section, the first surface element (21) relative to the second surface element (22) by the sliding guide (30) is guided linearly displaceable and - in a second movement section, the first surface element (21) and the second surface element (22) are coupled to each other and are pivotally guided together by the pivot guide (40). The furniture fitting is characterized in that a pivot axis of the pivot guide (40) is positioned at a distance from a plane in which the door (20) extends, so that the coupled surface elements (21, 22) in the second movement section in a rotation and Translational movement are performed. The invention further relates to a piece of furniture with at least one such furniture fitting.
