Abstract (en)

[origin: WO2017137208A1] The invention relates to a luggage rack module for constructing a luggage rack in a rail vehicle, wherein the luggage rack module (1, 18, 14, 21, 23, 24) has a storage shelf (2), which is fixed by means of at least one holder (4) with respect to a vehicle bodyshell (31) of the rail vehicle, a rear support profile (33), and a front support spar (5). The luggage rack module (1, 18, 14, 21, 23, 24) has a holder (4) at each of the two ends of the luggage rack module, which holder is constructed as a bow open toward the bottom, wherein the rear support profile (33) is designed to be attached to the vehicle bodyshell, and the storage shelf (28) extends over an entire length of the luggage rack module (1, 18, 14, 21, 23, 24), and is held in receiving grooves (14, 35, 6, 34) of the holder (4) of the rear support profile (33) and of the front support spar (5).
