Abstract (en)
[origin: WO2017098215A1] The following invention relates to split hulls, particularly to V shaped split hulls with a biased resilient member to mitigate against shock or blast. There is provided an armoured land vehicle comprising;a lower armoured v shaped hull;an upper hull which is located above and slidably engaged in a vertical plane with said hull, wherein there is at least one biased resilient member located between said upper hull and lower hull, to reduce the travel between said upper and lower hulls in the event of a shock event.
