Abstract (en)

[origin: WO2017097518A1] The invention relates to a position detection device (102) for a gear lever (100) of a vehicle, wherein the position detecting device (102) has a lighting range composed of a light source, a light conductor (106) and a light sensor, wherein the lighting range is designed to conduct light from the light source to the light sensor as a function of a position of the gear lever (100).
