Abstract (en)
[origin: US2018295935A1] A flexible shoe including an outer sole assembly and an upper, the outer sole assembly including a damping sole extending lengthwise from a rear end to a front end, widthwise between a lateral side and a medial side, and heightwise from a lower surface to an upper surface, the lower surface having lower grooves, the upper surface having upper grooves, the lower grooves of the lower surface being opposite the upper grooves of the upper surface. The lower grooves of the lower surface and the upper grooves of the upper surface correspond to the main articulations of the foot. The lower grooves of the lower surface and the upper grooves of the upper surface demarcate platforms of the damping sole.
