Abstract (en)

Engraving nippers for tiles or slabs made of hard material are disclosed, comprising a pair of mutually hinged lever pieces (1a, 1b), provided on two opposite sides of an hinge axis (2) respectively with a handle portion (1a', 1b') and an end head (1a'', 1b'') carrying cutting elements in the form of cutting wheels (4a, 4b) with a perimeter cutting edge, said wheels (4a, 4b) being fixed parallel to a fastening land which is perpendicular to a lying plane of said pair of lever pieces (1a, 1b), wherein said end heads (1a'', 1b'') are L-shaped, so as to define said fastening lands arranged cantilevered towards a side of said lying plane, and said end heads (1a'', 1b'') have opposing projections (5a, 5b) which extend according to a direction joining centres of said wheels (4a, 4b), up to a mutual distance shortly greater than the distance between said cutting edges of the wheels (4a, 4b).
