Abstract (en)
[origin: EP3388563A1] An additive supplying device (9) adapted to supply additive to be supplied to a prescribed position between an outlet of a draft device (11) and an outlet of a spinning device (12) is provided with a first detecting section (96) adapted to detect information relating to supplying state of the additive supplied by the additive supplying device (9). A control device (6) is adapted to determine presence or absence of an abnormality in the additive supplying device (9) in accordance with a detection signal of the first detecting section (96) .
