Abstract (en)
[origin: EP3388571A1] A clothes drying appliance (2) comprises a process air channel (1) and a heat pump (3, 4, 5), wherein an evaporator (3) and a condenser (5) of the heat pump (3, 4, 5) are accommodated within the process air channel (1), with the condenser (5) accommodated downstream of the evaporator (3) with respect to a direction of a process air flow and wherein a compressor (4) of the heat pump (3, 4, 5) is accommodated within the process air channel (1) downstream of the evaporator (2). The invention is particularly useful for household appliances, in particular open-loop or closed-loop drying appliances.
