Abstract (en)

[origin: WO2017102495A1] The invention relates to an arrangement and a method for intermixing a medium using an element (1) for generating a motion within said medium. The element (1) is connected to a drive unit (2). The drive unit (2) has a material (5) for thermally changing its geometric dimensions. The drive unit is connected to the element (1) in order for the shape to change. This change in shape causes the medium to be intermixed.
