Abstract (en)
[origin: WO2017102513A1] In a hand-held power tool (10) comprising a drive unit (20) for driving a working tool (42) in at least one non-percussive mode of operation, wherein the drive unit (20) comprises a percussion mechanism (30) for the percussive operation of the working tool (42) in an associated percussion mode, and wherein the drive unit (20) comprises a actuatable switching ring for switching the drive unit (20) between the at least one non-percussive mode of operation and the associated percussion mode, a servomotor is provided to actuate upon activation the actuatable switching ring for switching the drive unit (20) between the at least one non-percussive mode of operation and the associated percussion mode.
