Abstract (en)
[origin: WO2017102951A1] The invention relates to a system (S) which comprises an electrically operated handheld device, which particularly takes the form of a hot-air handheld device (1) or handheld grinding device, and a transport case (101) for the handheld device (1), wherein the transport case (101) comprises at least one first case shell (102). Here, the at least one first case shell (102) comprises an outer side (112), the case shell (102) comprising in its outer side (112) a depression (113) for partially accommodating the handheld device (1), and the depression (113) extending in the direction of a stowage space (114) of the transport case (101).
