Abstract (en)

[origin: WO2017103501A1] This drum (1000) for building and shaping a tyre carcass, comprises: - a surface (1106, 1506, 1206) for building a tyre carcass that is generally cylindrical in shape, having a main axis of rotation, - first and second movable surface supports, - adjustment members (1980, 1600, 1400, 1450) for adjusting a diameter of the surface, - adjustment members for adjusting an axial distance between the first and second supports. The drum further comprises first means (1700, 1800) for sealed connection between the surface and at least one of the first or second supports, and second means for sealed connection between the first and second supports.
