Abstract (en)

[origin: WO2017102631A1] The invention relates to an electric servo drive (10) for a motor vehicle, comprising an actuator (13) for at least indirectly moving an element (14) of the electric servo drive (10). According to the invention, the electric servo drive (10) additionally comprises at least one sensor element (15) which is designed to sense a measured variable that is not used for moving or actuating the element (14) of the actuator (13).
