Abstract (en)  
[origin: WO2017103837A1] The invention relates to a drone comprising a fuselage and a plurality of housing structures (3) for a plurality of engine units (4), the mechanical connection between each engine unit (4) and each housing structure (3) for the engine unit (4) comprising: a ball joint (10) arranged in the axis of rotation of the engine unit (4), opposite the rotor (6); and a flexible connecting member (20) connecting the engine unit (4) to the housing structure (3) for the engine unit (4).
