Abstract (en)
[origin: WO2017103467A1] The invention relates to a plastics container obtained by blow moulding or stretch blow moulding from a blank, this container comprising a body, a neck which extends at an upper end of the body and a petaloid base (4) which extends at a lower end of the body, this petaloid base (4) being provided with protruding feet (5) that are separated by recessed valleys (6) that extend radially from a central region (7) of the base (4), each foot (5) having an external wall (10) which extends in continuation of the body (2) and two side walls (11) that each border a valley (6) and are each connected to the external wall (10) by a fillet (12), each foot (5) being provided with at least one rib (14), a lateral portion (15) of which overlaps said fillet (12).
