Abstract (en)
[origin: WO2017105224A1] A packaging lid (1) for mounting over an opening of a packaging container. The lid (1) comprises a top side (2) that in a mounted state extends over an opening of the container and a skirt (3) extending from the top side (2). The skirt (3) has on an inner side (31) thereof resilient members (35) adapted to cooperate with an outwardly projecting ridge on an outer side of the circumferential wall of the container so as to secure the lid (1) to the container. The resilient members are formed as resilient elongate strips (35) having two ends (36) attached to the inner side (31) of the skirt (3) and formed as an arch which, in an unloaded state, has a rise with respect to the inner side (31) of the skirt (3).
