Abstract (en)

[origin: WO2017102866A1] The present invention relates to an aqueous, phosphate-free, structured liquid detergent composition, in particular a heavy duty liquid detergent (HDL) that comprises a surfactant system comprising an alkyl ether sulfate, a builder system and water, wherein the detergent composition has a viscosity of between 1.000 and 10.000 mPas and is free of stabilizing and rheology modifying acrylate-containing polymers. The invention further relates to methods for washing of textiles using the detergents of the invention.
