Abstract (en)
[origin: WO2017103531A1] The present invention relates to a method and a system for calculating, in real-time, the duration of autonomy of a non-refrigerated tank containing natural gas comprising a liquefied natural gas (LNG) layer and a gaseous natural gas (GNG) layer. The present invention also relates to a system for calculating, in real time, according to the method of the invention, the duration of autonomy of a non-refrigerated tank, as well as to a vehicle comprising an NG tank and a system according to the invention.
