Abstract (en)
[origin: WO2017102012A1] The invention relates to a fastening device for fastening a silencer to a handgun, wherein the fastening device has a fastening rail for fastening the fastening device to a mounting rail of the firearm, and a fastening means for fastening the weapon accessory to the fastening rail, wherein a fastening plate, which stands perpendicular to the fastening rail, is arranged on the front end of the fastening rail, wherein a shot channel is designed in the fastening plate that, when the fastening device is fastened to the mounting rail, extends coaxially to the center axis of the barrel of the firearm, and the fastening plate has the fastening means. The invention further relates to a weapon accessory that is designed to be fastened to a fastening device according to the invention.
