Abstract (en)  
[origin: WO2017103198A1] The cable is used, in particular, as an underwater cable and comprises a central element, which is surrounded by a cable sheath, which has an inner hydrophobic sheath layer made of a first plastic and an outer sheath layer applied to same and made of a different plastic to the inner sheath layer, wherein a polyolefin-type plastic is used for the inner sheath layer, wherein one of the sheath layers, in particular the inner sheath layer is chemically functionalised, and wherein a sealed connection is formed between the two sheath layers.
