Abstract (en)
[origin: WO2017102725A1] A female electrical contact for a cable connector including a cage (4) for housing the tongue (3) of a male contact. The cage (4) includes two lateral elastic retaining blades (16) that make it possible to limit the lateral movements of the tongue (3), in particular under the effect of vibrations. These elastic retaining blades (16) may bear on a protective sleeve (6) that surrounds the cage (4) also for the purpose of limiting the movements of the cage (4) within the sleeve (6).
