Abstract (en)
The invention relates to a stackable box with an inverted truncated pyramid shape, comprising a box body (1), with a base and respective walls (2), with the upper part open, and respective foldable flaps (3) on the upper part of at least a pair of facing walls (2), the flaps (3) being arranged horizontally on the inside of the box (1A) in a first position, and outside the vertical projection of the body of the box (1) in a second position. The connection of the flap (3) to the respective wall (2) thereof can be carried out by means of a hinge (4) or a thin strip (5). The flaps (3) can have respective tabs for locking onto the walls (2) adjacent to the wall supporting the flap (3).
