Abstract (en)

A car for lift and similar with walls (2, 18,19), a floor (16), a ceiling (17) and car doors (11), having a multimedia display (3) and/or a transparent display (13) with communication and interactive features in audio and video mode. Compared to the well-known cars for lifts and similar, the car of the invention offers the benefit of adding video signals to the communication audio signals of the user to the outer world. In addition, the car of the invention offers the maintenance operator the advantage of real-time communications with the service centre so as to receive audio and video instructions needed to carry out system maintenance.
