Abstract (en)

The present invention relates to a method for coating a steel plate with a metal and a metal-coated steel plate manufactured using the same. The present invention provides a method for coating a steel plate with a metal and a metal-coated steel plate manufactured using the same, the method comprising the steps of: heating first metal powder below a softening point; heating a gas to a temperature of 200 to 600°C; vacuum-ejecting the heated metal powder together with the heated gas, thereby forming a metal coating layer; and forming a second metal plating layer on the metal coating layer.
