Abstract (en)
[origin: EP3392740A1] [Object] To provide an information processing apparatus, an information processing method, and a program. [Solution]
An information processing apparatus including: an acquisition unit configured to acquire a recognition accuracy related to a recognition based on
sensing data; and a control unit configured to make a first user operation recognizable when the recognition accuracy is included in a first range, and
make a second user operation recognizable when the recognition accuracy is included in a second range different from the first range, the second
user operation being different from the first user operation and related to the first user operation.
