Abstract (en)

[origin: WO2017108870A1] The invention relates to an insulating glass element (I) for a refrigeration cabinet, at least comprising a first pane (11), a second pane (12) arranged at a distance from the first pane, said panes comprising two respective opposite parallel horizontal edges (14.1, 14.2, 15.1, 15.2) and two respective opposite parallel vertical edges (17.3, 17.4, 18.3, 18.4), at least two horizontally arranged spacers (13.1, 13.2) between the first pane (11) and the second pane (12), and two vertically arranged flat profiled sections (16.3, 16.4), each of which is secured to the vertical edges of the first pane (17.3, 17.4) and the vertical edges of the second pane (18.3, 18.4). The spacers (13.1, 13.2) and the flat profiled sections (16.3, 16.4) form an inner pane intermediate space (8) between the first pane (11) and the second pane (12), and at least one of the flat profiled sections (16.3, 16.4) is designed to be transparent.
