Abstract (en)

[origin: WO2017108420A1] The invention sets out from a portable machine tool, particularly a hammer drill and/or chisel hammer, that has a length (L), a width (B), a height (H) and a mass (m), having at least one energy storage unit that has a charge carrier capacity (Q) and having a quick-change tool holder for quick-change tools with a shaft diameter of less than 12 mm. It is proposed that a product (P) formed from the length (L), the width (B), the height (H), the mass (m) and the inverse of the charge carrier capacity (Q) is less than 1301 cm³ kg A h⁻¹.
