Abstract (en)
[origin: WO2017108016A1] The invention relates to a device for post-treating tyres (1) according to a vulcanization process, comprising at least one post-treatment station (80) having a PCI (Post Cure Inflator) (13) for applying pressure to the tyre interior using a support gas, wherein the at least one post-treatment station (80) is designed in such a way that the post-treatment of finished tyres (200), which are affected by residual heat, is supported.
