Abstract (en)

[origin: WO2017108288A1] Transporting and storage container (20) for liquids, having an inner container (22) made of plastics material, having an outer casing (31), which is designed preferably in the form of a lattice and is made of metal, and having a pallet-like lower framework (24), which is designed to be handled by means of forklift trucks or similar means of transport, and having a supporting base (23) which is made of sheet metal and is intended for supporting the inner container (22), which has at least one filler nozzle (45) provided on its upper side, wherein the inner container (22) and the outer casing (31) have arranged between them an intermediate container (21) which is made of sheet metal, accommodates the inner container on all sides and has a lateral-surface enclosure (25), a container cover (26), which is connected to the lateral-surface enclosure (25), and a container-base, which is connected to the lateral-surface enclosure (25), wherein the container base is formed by the supporting base (23) of the lower framework (24).
