Abstract (en)

[origin: CA3008739A1] Disclosed is a reaction resin composition comprising: a radically polymerizable compound; an initiator system having an  $\alpha$ -halo carboxylic acid ester and a catalyst system containing a copper (II) salt, a reducing agent and at least one ligand containing nitrogen; a hydraulically curing compound; and water. Also disclosed is a two- or multi-component system containing said reaction resin composition and uses of said composition for construction applications.
