Abstract (en)
[origin: WO2017111979A1] The present application relates to crystalline forms A, D, F, G and I of obeticholic acid. These crystalline forms are useful in the production of Obeticholic acid (in particular its purification), which is a drug useful for the treatment or prevention of a FXR mediated disease or condition, cardiovascular disease or cholestatic liver disease, and for reducing HDL cholesterol, for lowering triglycerides in a mammal, or for inhibition of fibrosis.
