Abstract (en)
[origin: WO2017111737A1] The subject of the invention relates to a flushing apparatus, which is mounted on a ceramic sanitary ware to enable the bowl of the ceramic sanitary ware to be flushed, and to a method for flushing the bowl by the use of this system. The flushing apparatus (A) according to the invention comprises at least one inner body (1), at least one outer body (2), at least one cover (3) and at least one flow rate regulating piece (4). It further comprises the fixing pieces (5), the fixing members (8), the sealing members (6) positioned on the outer body and the sealing members (9) positioned on the inner body. The flushing apparatus (A) developed within the scope of the invention may be used both in the presence and absence of a bidet system.
