Abstract (en)

[origin: WO2017207000A1] A device for filling and/or at least optically sealing an expansion joint (1) between two components (2, 3), in particular between a floor (2) and a wall (3), having a mechanically acting joint body (4), a receiving body (5) which at least partially accommodates the joint body (4) and optionally at least one elastic element (6) which is provided in the receiving body (5) and acts between the joint body (4) and the receiving body (5), wherein the receiving body (5) is associated with one of the components (2 or 3), and the joint body (4) acts between the components (3 or 2), wherein the joint body (4) is movably mounted in the receiving body (5) in such a way that it substantially closes and/or seals the expansion joint (1).
