Abstract (en)  
[origin: WO2017108226A1] Disclosed herein is a method of authorising an action at a first computer system. The method comprises receiving a new authorisation code at the first computer system, wherein the new authorisation code is generated from a previous authorisation code by a second computer system, authenticating the new authorisation code, and authorising an action following successful authentication of the new authorisation code. A computer-readable medium for implementing this method is also disclosed.
