Abstract (en)

[origin: WO2017108622A1] The invention relates to a multi-functional electrical connection assembly for transmitting medium and high current densities, consisting of a socket (2) having contact openings (11), a contact carrier (12), a contact element (1) consisting of a contact plate (9), and a contact pin (4) which protrudes from the contact plate (9) and which is arranged eccentrically on the contact plate (9).
