Abstract (en)  
The present invention provides a split mould (10) for particular use in moulding large concrete components (12) having a weight bias to one end, the split mould (10) comprising a pair of mould sections (14, 16) separable from one another and defining a mould cavity (20) therebetween, and a guide member (18) which is adapted to allow the mould (10) to be rolled into an inverted position, in order to allow the mould (10) to be emptied.
