Abstract (en)

[origin: WO2017112974A1] The invention relates to a device and to a method for producing a shell (2) of a ski boot (1) that in some areas is adapted to a foot, or a leg, of a user, comprising a lower and/or upper shell part (3, 3') made of a plastic material, and a heating element (10) for sectionally heating the lower and/or upper shell part (3, 3') above the softening temperature of the plastic material. The heating element (10) has an outer adhesion-promoting layer (11) for connecting the heating element (10) to one of the shell parts (3, 3') of the ski boot (1).
