Abstract (en)

[origin: WO2017115022A1] The present invention relates to a device for applying a fluid and/or pasty product to keratinous fibres, comprising an elongate core (1) extending along a longitudinal axis XX and at least one supple flexible wand (2) oriented longitudinally and inset at least at a first point onto the longitudinal core, the core and the said at least one wand being obtained by injection moulding in a single piece. According to the invention, the core is made of a first plastic and the said at least one wand is made of at least one second plastic.
