Abstract (en)
[origin: CN109069877A] Compositions including polycarbodiimide and derivatives thereof together with one or more of a compound chosen from alkyl monoamines, alkoxylated polyamines, alkoxylated monoamines, polyamines, and silicone amines, and mixtures thereof and derivatives thereof to enhance the quality of the keratinous substrates. The present invention relates to a cosmetic treatment and process for treating keratinous materials, in particular for hair-care and hair-styling, wherein the composition can include the polycarbodiimide and one or more of a compound chosen from alkyl monoamines, alkoxylated polyamines, alkoxylated monoamines, polyamines, and silicone amines, and mixtures thereof in amounts sufficient to impart hydrophobicity to keratinous substrates, including hair fibers, upon application thereto. It is in particular a hair treatment composition and process for one or more of enhancing durable non-permanent shaping and curling of the hair, improving color deposit, improving color retention and extending color durability.
