Abstract (en)

[origin: WO2017114786A1] The present invention relates to an anhydrous composition in aerosol form containing: i) an oily phase comprising: - at least one volatile oil, - at least one antiperspirant active agent chosen from aluminium and/or zirconium salts or complexes, - at least one vinylpyrrolidone-derived polymer; and ii) at least one propellant. Another subject of the invention is a cosmetic process for treating human perspiration, and optionally the body odours associated with human perspiration, especially underarm odours, comprising the application of said composition to a surface of the skin. Finally, a subject of the invention is a use and an aerosol device using the said cosmetic composition.
